OBJECTIVE

B.Tech CSE graduate (2026) seeking an entry-level **MERN Stack / Full Stack Developer** position with strong skills in **React.js, JavaScript, Node.js, Express.js, MongoDB, REST APIs, HTML, and CSS**. Eager to apply software development skills, build scalable web applications, and contribute to organizational growth.

SKILLS AND INTERESTS

Programming Languages

Java, Object oriented programming(OOP),
JavaScript, C++, SQL

Other Knowledge

OOP, Data Structures & Algorithms, DBMS, REST
APIs, CRUD Operations, SDLC, Agile, API
Integration, Authentication

Tools

Git, GitHub, Postman, Visual Studio Code, npm

Databases

MongoDB, Mongoose, MySQL, SQL

Web Technologies

React.js, Node.js, Express.js, HTML5,
CSS3, Bootstrap, EJS, JSON, JWT, Middleware

Soft Skills

Problem-Solving, Analytical Thinking,
Communication, Teamwork, Adaptability, Time
Management

EDUCATION

Bachelor of technology (BTECH)

Chandigarh group of colleges Mohali
CGPA: 7.7

06/2022 – 07/2026

PROFESSIONAL EXPERIENCE

MERN Stack Development Internship

ThinkNEXT Technologies

02/2026 – 07/2026

Chandigarh, IN

Developed and supported full-stack web applications using **React.js, JavaScript, Node.js, Express.js, MongoDB, and REST APIs**. Implemented **CRUD operations, JWT authentication, middleware, API integration, data validation, and error handling** to build reliable application workflows. Used **Git/GitHub, Postman, and debugging practices** while following software development and testing principles.

PROJECTS

Home Rental & Booking Platform

- Developed an **Airbnb-style rental booking platform** using React.js with property listings, search, authentication, booking, and responsive frontend functionality.
- Built **RESTful APIs and CRUD operations** using Node.js and Express.js, with MongoDB/Mongoose for database management and JSON-based data handling.
- Implemented **JWT authentication, session management, Multer image uploads, middleware, validation, and error handling** for secure application workflows.
- Tested, debugged APIs using **Postman**, followed Git/GitHub version-control practices for full-stack development.

Enterprise Incident Management System

- Developed a full-stack **incident management platform** using React.js, Node.js, Express.js, and MongoDB to manage incident creation, assignment, priority, status tracking, and resolution.
- Implemented **RESTful APIs, JWT authentication, role-based access control, CRUD operations, validation, middleware, and error handling** for secure and scalable application workflows.
